

adhesive & bonding supplies

band-it

light cure cement

- > Medium viscosity means easy to use.
- > Blue paste means easy to clean up.
- > The resin & glass ionomer cement allows for the slow release of fluoride.
- > Has no unpleasant taste.
- > The syringe & capsule design provides easy & accurate delivery.
- > Superior adhesion with a high resistance to washout & band looseness.

1 Syringe	DB09-0100	£20.50	= 30-40 bands
Economy Pack (4)	DB09-0101	£65.75	
Bulk Pack (8)	DB09-0102	£114.50	

bond-it

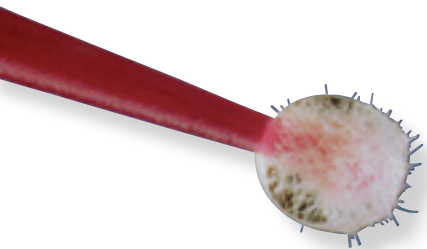

light cure adhesive

- High viscosity means a low drift for accurate bracket placement.
- Has a distinguishable colour to facilitate clean up of flash.
- Is the only adhesive that transitions to tooth colour after 2-3 weeks.
- Superior bond strength compared to leading brands.

Kit (2 Syringe)	DB09-0200	£70.75
Kit (4 Syringe)	DB09-0201	£96.50
<i>Replacement parts</i>		
Adhesive Syringe	DB09-0202	£17.75
Light Cure Sealant	DB09-0203	£25.50
Etch Sealant	DB09-0204	£10.00
Mixing Pad	DB09-0205	£3.00

adhesive & bonding supplies

Micro Brushes

The Microbrush is designed to allow total control in applying small amounts of material to area of limited access.

The Microbrush non-linting bendable head allows savings of up to 60% by the reduction of excess bonding and etching solution applied by using a traditional bristle brush.

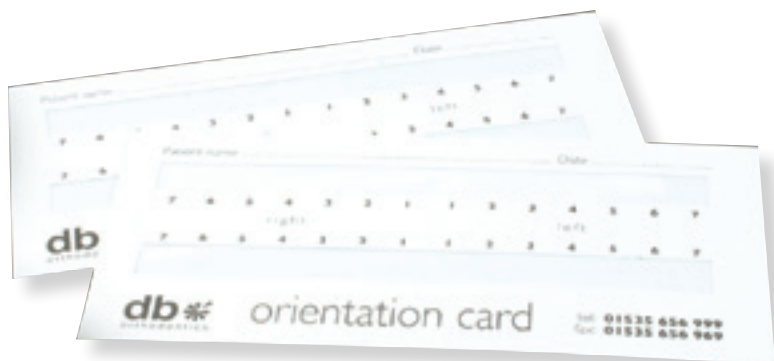

Microbrushes can be used for: Etchants, Bonding Agents, Cavity Liners, Fluoride Varnishes, Acetone plus many more day to day situations.

Original - Regular Tip

4 tubes of 100 applicators.
